STEP 6: ASSEMBLE THE CABINET DOORS
Carefully turn the leg and cabinet assembly back over onto the casters.
Assemble the cabinet doors [J,K] to the bottom shelf. First identify the left and right doors. Put the fixed pins into the bottom shelf [L] and press the top pins to insert into the front connector plate [Q].

STEP 7: ASSEMBLE LID AND COOKING CHAMBER TO THE LEGS

⚠️ ATTENTION ⚠️ 2 persons are needed for this step.

⚠️ CAUTION ⚠️ Avoid pinched fingers and hands! Keep fingers and hands clear of the connection area.
First make sure the locking casters are in the locked position so the leg and cabinet will not move around.
Very carefully place the lid and cooking chamber [A] onto the legs. Adjust so the front of the cooking chamber is flush with the front of the legs and resting on top of the legs. See STEP 7A.
Carefully open the lid and keep the cooking chamber steady. Use (8) 10MM bolts [BA] to assemble the cooking chamber to the legs. Tighten all bolts securely. See STEP 7B.
STEP 8: ASSEMBLE LID HANDLE AND TEMPERATURE GAUGE

Assemble the lid handle [X] to the lid using (2) 15MM bolts [AZ] and (2) large finishing washers [AJ]. Assemble as shown.

Remove the brass hexnut from the temperature gauge [AG] and align the probe key with the lock on the logo plate [AH].

Align the temperature gauge and logo plate probe and pins with the holes in the lid. Secure to lid with the brass hexnut.

STEP 9: ASSEMBLE THE BLOCKING PLATE AND VENTS

Assemble (2) vents [AC] to the lid using (1) M6 x 10MM bolt [AQ] and (1) M6 locking hexnut [AX] per vent. Tighten enough to allow for some friction.

Assemble the blocking plate [P] to the cooking chamber using (4) M6 x 10MM bolts [AQ] and (4) M6 kep hexnuts. Tighten bolts securely.

Assemble (1) vent to the cooking chamber and (1) vent to the blocking plate using (1) M6 x 10MM bolt [AQ] and (1) M6 locking hexnut [AX] per vent. Tighten enough to allow for some friction.

DO NOT RETURN PRODUCT TO THE STORE. IF YOU HAVE QUESTIONS OR HAVE TROUBLE WITH ASSEMBLY, PLEASE CALL 1-877-347-4557 FOR ASSISTANCE.
STEP 10: ASSEMBLE THE CHARCOAL PAN ASSEMBLIES

Assemble one assembly at a time to avoid mixing up parts.

Identify the right charcoal pan assembly [T]. See STEP 10A. Remove the push plate rod from the right charcoal pan assembly [T]. Using needle nose pliers or pliers, pull the (2) locking pins from the rod ends. Remove the push plate rod from the (2) top support bars and set aside. See STEP 10B.

Align the holes and assemble the charcoal pan assembly to the cooking chamber.

Start on the push plate side. Insert the threaded sleeve bracket [AF] into the hole and assemble the side with (2) M5 x 15MM bolts [AP] as shown. See STEP 10C.

Return the push plate rod to the assembly inserting the ends of the rod into the brackets and support bars. Secure the rod with the locking pins. See STEP 10D.

Finish by using (2) M6 x 10MM bolts [AQ] to assemble the opposite side to the cooking chamber. See STEP 10E.

Assemble the left charcoal pan [U] assembly the same way.
STEP 11: ASSEMBLE THE CHARCOAL PAN CRANK ADJUSTMENT HANDLES

Thread the charcoal pan crank adjustment handles [AD] into the threaded sleeve brackets [AF].

Crank the pans up and down a few times to make sure they work properly. Secure the handle with (1) M4 x 10MM bolt [AY] per handle. See STEP 11A.

STEP 12: ASSEMBLE THE ACCESS DOOR HANDLES

Cut the nylon ties and remove the ties, polybag and packing material around the access doors.

Remove the latch and M6 kep hexnut from the access door handle [AE]. The flat washer remains and assembles on the outside. Insert the threaded end of the handle into the access door hole.

Slide the latch onto the handle so it aligns with the key. Note the position of the latch. Secure with the M6 kep hexnut. Tighten securely.

Assembly is the same for the other side.

BRAVO CHARCOAL GRILL OPERATING INSTRUCTIONS

**WARNING!** This grill becomes very hot and possibly the handles. Use caution working around the grill. Use mittens or oven gloves when opening the lid, access doors, ash tray or adjusting the vents during use.

1. Pour the desired amount (3-6 lbs.) of charcoal onto the charcoal pan(s).
2. Keep all charcoal inside the pans. Do not allow charcoal to come in contact with the sides. Pick up any loose charcoal that falls onto the ash pan.
3. Adjust all vents to full open and keep the lid open.
4. Light charcoal according to the charcoal manufacturer instructions.
5. After the flames have disappeared from the charcoal, close the lid, keep all vents full open.
6. After about 10-15 minutes, check the charcoal to see that it has ashed over (turned gray) and the initial starter odors are gone.
7. Adjust the charcoal or spread the charcoal evenly across the charcoal pan(s) if necessary.

**OPTIONAL:** If preferred, small wood chunks can be added to the charcoal at this time for flavor and smoke. Crank the charcoal pans to the lowest position away from the cooking grates. Carefully open the access door(s) and carefully add small wood chunks on top of the charcoal. The smoke will be heavy at first and after a short while will burn with less smoke. The temperature will spike when the wood is first added. As a general rule, you will need to add more wood or charcoal when the temperature drops below 250 degrees. Do not use more than 2 or 3 wood chunks at a time. DO NOT ALLOW THE WOOD CHUNKS TO TOUCH OR COME IN CONTACT WITH ANY SIDE PANEL. Keep wood chunks inside the charcoal pans.

8. The optimum cooking temperature is 300–350 degrees. The vents may need to be adjusted more open or more closed for the desired temperature. The type charcoal and the climate conditions can affect the grill temperature.
9. Carefully wipe the cooking grate surfaces with vegetable oil to keep the food from sticking.
10. Add meat and food as desired to the cooking grates. Cook food to your personal preference.
11. Add charcoal or wood as needed through the access doors.

**Tip:**

The adjustable charcoal pans can be moved to within a few inches of the cooking grate allowing you to sear the meat and lock in the juices. Searing takes only a few minutes on each side. Don’t allow the meat or food to burn. After searing, crank the charcoal pans back down from the top and cook the food to your personal preference.
If you are unsure about when food is done, use this chart as a guide for measuring properly cooked meat temperatures.

Use a high quality meat thermometer with probe to measure the meat temperature. Push probe into the thickest part of the meat to get an accurate measurement. The temperature gauge on the grill measures the air temperature of the grill cooking chamber, not the food temperature.
